

Swimming Pool Skimmer

Features

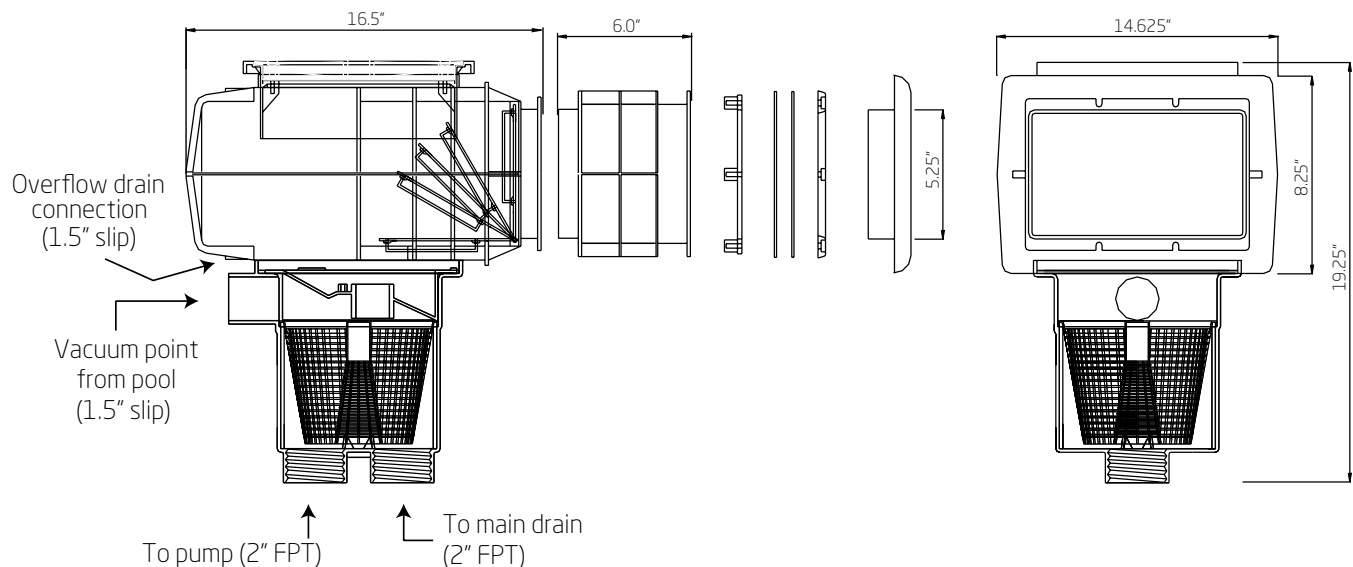

- Rugged reinforced housing has extra large filtration area.
- The lid is made of durable and rigid polypropylene which can be safely secured with two stainless steel screws.
- The deck collar has an adjustable height allowing for a variety of deck materials and thickness.
- Various plumbing options for different installation applications:
 - Two 2" bottom ports for connection to pump and main drain.
 - Extra suction port for connection to vacuum or automatic suction cleaner designed to eliminates the need for an in-line strainer.
 - Overflow drain connection preventing the pool from overflowing during heavy rain.
- The one piece leaf trap basket offers ease in removal and clean-out.
- Throat extensions are available in 3.5" increments. Collar extensions are also available.

Applications

- Perfect for residential in-ground pools (concrete, fiberglass, and vinyl liner.)
