Normblock Multi Series

All Plastic Commercial Pool Pump 1750 RPM
(7.5 HP, 10 HP, 15 HP, 20 HP, 25 HP & 30 HP)

Features

- This pump has a robust horizontal single stage design.
- Superior slow (1750 rpm) running design reduces vibrations resulting in quiet operation.
- The housing is made of high performance plastic (THK), corrosion resistant without elaborate internal coating and can be used with higher salt concentrations.
- Heavy duty energy efficient totally enclosed fan cooled (TEFC) motor, Class F insulation, protection class IP 55. Sealed ball bearings need no lubrication.
- The motor can be replaced without disassembling the pump. This design allows for the mechanical seal to remain in place.
- A high wear and rugged Carbon/SiC - EPDM mechanical seal allows for a long life and long maintenance intervals.
- Equipped with stainless steel shaft extension.
- Optional all plastic strainer tank for horizontal flooded suction applications.
- Every pump is tested to factory & customer’s specifications.

Please Note: The noise level from both the motor and pump are greatly influenced by how they are installed. Consideration should be given to minimize vibration and noise transmission.

Trademarks and Certifications

Applications

- Ideally suited for aquatic facilities, fountains, water parks, and pools with elevated salt concentration.
- Perfect with automated flow systems.
- Perfect for aquaculture.
